Education

National University of Computer and Emerging Sciences (FAST-NUCES) **Sep 2020 – Jun 2024**
Bachelor of Science in Software Engineering *Lahore, Pakistan*

Experience

Full Stack AI Engineer **Apr 2025 – Present**
KCube AI *On-site*

- Build and deploy production web applications using Python, Django, FastAPI, React, and PostgreSQL across backend, frontend, and database layers.
- Design and implement RAG and agent-based workflows with LangGraph, OpenAI APIs, Azure OpenAI, and vector embeddings for conversational retrieval and multi-step task execution.
- Integrate Twilio, ElevenLabs, Meta Graph API, and Xero to support voice interactions, social-memory imports, and accounting data workflows.
- Manage Azure deployments and GitHub Actions CI/CD pipelines, and work directly with clients to translate requirements into releases and resolve production issues.

Associate Software Engineer **Nov 2024 – Apr 2025**
Grayphite *On-site*

- Developed Django REST APIs and optimized database queries to improve backend response efficiency and maintainability.
- Implemented real-time notifications with WebSockets to deliver user and system events without polling.
- Integrated the OpenAI API to generate personalized recommendations from user inputs and application data.
- Reviewed pull requests and worked through Agile sprints to resolve defects and deliver backend features.

Python Developer Intern **Aug 2024 – Sep 2024**
Grayphite *On-site*

- Contributed to Django backend modules and REST API endpoints, including request validation, database operations, and API testing.

Projects

CoreMemories AI *[Live Demo]* | *FastAPI, React, PostgreSQL, RAG, Twilio, ElevenLabs*

- Built an AI memory vault that stores personal stories in PostgreSQL and retrieves relevant memories through a RAG-based conversational interface.
- Implemented voice interactions with Twilio and ElevenLabs and connected the Meta Graph API to import Facebook memories into the platform.
- Developed onboarding, memory-management, subscription, and administration workflows across the FastAPI backend and React frontend.

Medial AI | *Python, LangGraph, Azure OpenAI, PostgreSQL*

- Built an accounting analysis platform that ingests Xero data and produces financial reports and conversational answers.
- Created RAG pipelines to index and retrieve information from **millions of accounting records and financial documents**.
- Implemented a LangGraph multi-agent workflow with Azure OpenAI and PostgreSQL to decompose financial questions, execute retrieval tasks, and synthesize responses.

Price Comparison Intelligence Tool | *Python, Vector Embeddings, Data Pipelines*

- Built a cross-platform product-matching pipeline that locates a reference product on Amazon and compares it with listings from other e-commerce websites using vector embeddings.
- Achieved **91% matching accuracy** in identifying the same or closely similar products across evaluated e-commerce listings.

Word-Level Sign Detection System | *Python, PyTorch, OpenCV, I3D, React*

- Trained an I3D-based video classification model for word-level sign recognition and implemented the inference pipeline in Python.
- Connected model predictions to a React interface to capture signs and display recognized words in real time.

Technical Skills

Languages: Python, JavaScript, C++, Java, Kotlin, SQL
Backend & Frameworks: Django, Django REST Framework (DRF), FastAPI, Node.js, Express.js, Celery, REST APIs
Frontend: React, HTML5, CSS3, Bootstrap
Databases: PostgreSQL, MongoDB
Cloud & DevOps: Azure, AWS S3, Docker, GitHub Actions
Tools: Git, Postman, OpenAPI/Swagger
AI Engineering: OpenAI API, Azure OpenAI, LangGraph, LangChain, LangSmith, RAG, Vector Embeddings, AI Agents, Multi-Agent Systems, Model Context Protocol (MCP)
Machine Learning: PyTorch, OpenCV, I3D

Certifications

Model Context Protocol: Advanced Topics – Anthropic	Jul 2026	Verify
Front-End Development – Meta	Feb 2023	Verify
Android Mobile Application Development – Meta	Jan 2023	Verify
